Green Living Science.

Creating a Greener Detroit, One Mind at a Time.

Who we Teach

While all of us can benefit from knowledge about material use, youth are particularly critical. We have received over-whelming feedback from the teachers and families of students who have shared what they learned. It is the motivation of young people that sparks conversation about waste disposal, pollution and material use in homes across Detroit.

Urban youth are statistically less likely to pursue degrees in environmental science. As such, they are in greater need of outreach, encouragement, and information.

Nationally, minority students experience a gap in science achievement scores. Green Living Science works to close this gap by encouraging understanding of science in daily life, piquing interest in science and STEM careers, and providing a continued resource to the Detroit students. Green Living Science is focused on increasing *scientific literacy* - the "ability to use scientific knowledge and processes to understand the natural world and to participate in decisions that affect it (in three main areas - science in life and health, science in Earth and environment, and science and technology.)"

It is recommended that all students have a solid foundation in STEM because "the saturation of technology in most fields means that all students - not just those who plan to pursue a STEM profession - will require a solid foundation in STEM to be productive members of the workforce." The innovative nature of the Green Living Science educational programming is such that it will support regional recycling, build science comprehension, and emphasize personal decision-making through STEM education.

BEE Active! BEE Involved!

The Detroit-Flint Next Urban Challenge seeks to find the Next All Star Chef. There will be two semi final rounds. The first semi-final will decide the Detroit representative. The second semi-final will decide the Flint representative. The two winning teams will face off at the Eastern Market in Detroit, Michigan to decide who will be called the Next Urban Chef.

Next Urban Chef Detroit Contest Application

First Name _____ Last Name _____
 Address _____ City _____ Zip _____
 Phone _____ Email _____
 Birthday _____

Contest Rules:

By submitting this application you agree to the following:

- You live in the City of Detroit.
- You are over the age of 16.
- You have no formal culinary training nor have you ever been employed as a professional cook.

Please submit your application by July 1st, 2011 @ 12:00PM to nexturbanchef@gmail.com or fax it to (313) 871-5329.

Please respond to the following on a separate sheet, preferably printed or typed:

1. Tell us a little about yourself, including how you came to be interested in cooking.
2. Why do you think it is important to use fresh local ingredients as much as possible in your cooking?
3. If you are selected to participate, what dish would you prepare? Include a complete list of ingredients and supplies you need to create the dish.
4. (Optional) Is there anything else you want us to know about you or your passion for cooking?

Bring your heat to the kitchen for a local foodshed challenge!

Detroit Semi-Finals are August 6th at Historic Eastern Market
Flint Semi-Finals are September 10th at the Flint Farmers Market

Teams of contestants will work with local Chefs to

Contestant applications due July 1st!
