

Green Team Coalition Presents:

▶ WHO CAN BENEFIT?

Companies and municipalities around the world are saving vast amounts of money by upgrading facilities with energy-efficient lighting products, taking advantage of local utility rebates as well as federal incentives. But did you know studies have shown that using an independent energy consultant realizes additional savings of up to 40%?

Green Team Coalition, LLC now offers a new Lighting Efficiency Assessment & Financial Services (LEAFS) program that conforms to new lighting standards and regulations and maximizes savings. Join us for an educational seminar that covers new specifications and lighting standards with Eric Hansel, Vice President of Technical Lighting Solutions for Green Team Coalition. Eric has over seventeen years of experience in the lighting industry, is widely regarded as a Lighting Retrofit Expert and has served as Lighting Subject Matter Expert for Ford Motor Company, Lighting Consultant to DTE Energy, and Director of Retrofit Sales for numerous other companies.

Find out how your facility might benefit by leveraging the expertise of an independent lighting consultant whose purpose is to identify the best lighting solutions, with no particular product loyalty.

▶ EVENT TOPICS INCLUDE

- Sifting through LED and other new lighting technologies and products
- Case studies of retrofit projects and missed energy-savings opportunities
- The DOE's new LED lighting program for municipal street lighting
- The importance of understanding and using IESNA, ASHRAE and other lighting standards
- The benefits of an Independent Lighting Consultant
- Financing options for energy efficiency projects
