### Job Description

Bosco's Pizza Co. part of the Tyson Foods family is looking for Refrigeration Technicians.

#### Overview:

The refrigeration technician is responsible for operation, inspection, and repair of ammonia refrigeration systems in a Frozen Food Manufacturing Environment in accordance with IIAR and RETA standards, state and local building codes, and required safety regulations. The refrigeration technician is a core team member and subject matter expert in Process Safety Management, Risk Management, and Hazmat. The refrigeration technician is the leader and developer of his/her team, ensuring that we have highly skilled, motivated, and engaged staff to support plant operations.

#### Duties:

- Day to day operations of ammonia system
- Provide immediate and long-term corrective action to all levels of equipment/system failures utilizing root cause analysis and troubleshooting techniques
- Writes procedures and has the ability to enforce Management of Change.
- Keeps and maintains documentation for PSM and RMP within the limits set by OSHA and EPA
- Supervise and provide informal and formal training for other team members

- Ensure PM's are completed in a timely manner and ensuring mechanical integrity of the ammonia system per RMP/PSM guidance is followed
- On call duties to include nights and weekends

#### Skills:

- Troubleshoot, maintain and manage systems of 8500 lbs. or above of ammonia
- Read and interpret schematics, P&ID drawings, Blue prints, and flow diagrams.
- Strong aptitude for troubleshooting mechanical/electrical issues
- Handle multiple and complex tasks
- Awareness and knowledge of surroundings in relation to climate, atmosphere, and equipment
- Adhere to work schedules in completing and performing assigned tasks
- Work variable shifts, weekends, and/or holidays
- Has and attention to detail
- Independent Self Starter/Team Player
- Effective written, oral, and interpersonal communication skills
- Good analytical and problem solving skills

#### Experience:

- Four year college degree desired
- This is a must, a RETA 2 certification or equivalent, ability to pass RETA 2 test within one year of employment.
- 3-5 years ammonia refrigeration experience
- Must have experience and strong knowledge of Process Safety Management, Risk Management, and Hazmat programs
- Electrical background desired
- Previous experience in a food processing environment is a plus as well as supervisory experience in a maintenance environment

- Proven track record of leading, teaching, coaching, and inspiring passion
