

It's win-win, redefined.

TCS provides controls engineering and submittal generation for the product lines you request. Spikes in demand for engineering resources and the need to control project and/or salary costs usually drive the need for engineering outsourcing. TCS can address both by delivering your project on time within your budget. TCS delivers exceptional quality through our highly qualified engineers, with over 50 years combined experience, focused on the controls engineering domain.

Resources and Capabilities:

- TCS offers engineering, submittal generation, product selection, software, and graphics services. No need to hire or dedicate employees to these tasks.
- TCS uses your logo throughout the project, providing a seamless interface with all of your documentation.
- TCS has the ability and willingness to be diverse. We can react quickly and efficiently to any situation, from turnkey projects to individual services.
- We provide engineering submittals with your logo.
- Provide graphics for Tridium
- There are no setup fees to add your logos and product lines to our library.
