

Environmental Sustainability

Landfill Diversion

We divert tons of reusable and often scarce building materials from landfills, recycling materials unsuitable for reuse and minimize waste.

Stewardship

By limiting the amount of solid waste placed in landfills each year, salvage is an excellent way to demonstrate our commitment and concern for the environment, to improve quality of life, and to pass on a better world for our children and for future generations.

Control Environmental Hazards

We use industry-leading safety procedures, containment systems, and cleanup equipment to keep our customers and workers safe from lead paint, asbestos, silica, general nuisance dust and other hazards.
